

**PREPARATIONS FOR WAR IN MASSACHUSETTS AND NEW HAMPSHIRE.**—The New York World of Monday has the following despatch from Boston:

There is no disguising the fact that Massachusetts is ready to respond promptly to any demand made upon her for troops to sustain the Union and the laws. I learn to-day, from the highest authority, that seven thousand troops can be put in marching order in twenty-four hours, and the same hundred and forty-five thousand men are enrolled in the militia of this State. Of this number twenty thousand could be easily mustered.

The financial resources of Massachusetts were never in better condition for such an emergency, and the people are enthusiastic to aid.

Adjutant General Abbott of New Hampshire, arrived here this afternoon from Washington, and left immediately for Concord, with the intention of recommending to Governor Goodwin that the Granite State be immediately put upon war footing.

Considerable excitement exists in consequence of the reports that the muskets removed from the arsenals of the armory have been distributed over the South. The attorney, collector of this post, late superintendent of the armory at Springfield, returned from them to-night, having been there it is supposed, with reference to the report from Washington to the World, that twenty thousand recently taken from the arsenals and sold.

The finding is deep and well to be misinterpreted. There is no mistaking the fact that Massachusetts is in earnest in this crisis. The merchants are plucky, and the name of Andrew is uppermost in every conversation.

Editorial Note.—Garibaldi is preparing to enter Venezuela in the spring. He has just issued a brief address to the Indians, calling them to sustain the government of the King of Sardinia; and concludes by saying that the 5th of March, 1861, should see Victor Emmanuel at the head of an army of half a million of men. Peleg surrendered to the Allies on the 13th of October yielding to all their demands, and was sent to the Emperor of Austria's Summer palaces, from which an enormous amount of spoils were said to have been taken, is confirmed. The Emperor and the Tatar army had fled. A new rebellion at Shanghai was reported. The news from Hungary is very revolutionary. Rots have taken Debrecen, and in several other large towns there is evidently an insurrection on the part of the population of the whole country to the again Austria. The Sardinians were to await the fall of Gaeta before summoning Messina to surrender, and in case of refusal, they would besiege it. The Russian decree emancipating the peasants has been signed by the Emperor, and was to be promulgated on the 1st of January.

R. P. Baker of Fall River has gathered signs of distinct growths of pairs from the first day of his premises, during the past season. The hair grown is large and fair, the scurf of hair small, and the third about the size of a pigeon's egg.

This variety is known as the Beur de Japon.

**AN INCIDENT OF THE ITALIAN INSURRECTION.**—It is sometimes inconvenient to be famous. Professor Holloway, the distinguished medical reformer, once had experience of the fact. It was his fortune, or misfortune, to be in Plymouth when the Italian revolution of 1848 was at its culminating point. He had been on a tour through the Swiss Alps, investigating the phenomena of an extraordinary case of disease, which he had named "crotchetism." While thus engaged, and intent on observing the effect of his remedies upon the prescribed and hideous rags who have inherited for many generations that horrid disease, the torch of civil war had been lighted at Milan, and its flames had inundated the Alpine countries and the Alpine story.

At the time when he set forward to his journey, the Sardinians were in the village of Buttano, on the bank of the River Billone, and Holloway, who had been told that some of the worst and most fatal diseases to afflict man were to be found in that region, which in its most distressing forms may be cured by the application of Dr. Phelps Brown's famous nostrum, was anxious to get into touch with him. The Sardinians were to await the fall of Gaeta before summoning Messina to surrender, and in case of refusal, they would besiege it. The Russian decree emancipating the peasants has been signed by the Emperor, and was to be promulgated on the 1st of January.

R. P. Baker of Fall River has gathered signs of distinct growths of pairs from the first day of his premises, during the past season. The hair grown is large and fair, the scurf of hair small, and the third about the size of a pigeon's egg.

This variety is known as the Beur de Japon.

**THE STAFF OF LIFE.**—The sense of this sentence is generally applied to bread; but when the Indians call it "the Staff of Life," it would be more appropriate to name it "the Staff of Soda." It is a housekeeper who always would be called the "Staff of Life," and the ten years of her life probably passable health. For sale at all the grocers' stores in New York, \$1.00 per box.

DR. LYONS'S KATHARION FOR THE HAIR.—Nothing has ever been made more beautiful than this hair-dressing lotion. It is a delicate, clear, and transparent liquid, containing astringent properties, and is particularly adapted for the beautifying of the hair. It is a delightful odor, and leaves the head of hair, try it. Sold everywhere.

WHERE ALL THE MONEY?—Can any body tell where all the small change has gone?—one of the most popular questions in this country. It is a mystery to us all, and we have always been unable to find out what becomes of it. But a good lawyer, Mr. Bryan's "Lawyer," has surmised, has paid to his client, Dr. Remond, \$1,000, and the mystery is solved.
